

**C.R.I.
SUBMERSIBLE
MOTORS - 60Hz**

C.R.I. MOTORS

Pumping trust. Worldwide.

T H E B E G I N N I N G

of C.R.I., way back in 1961, was a resolute attempt to produce a few irrigation equipments using the limited facilities of an in-house foundry. Eventually the founder's dream was coming true as the small production unit he started kept growing rapidly. Now, after more than five eventful decades, it is an enormous, widely reputed organization, which produces more than 2300 varieties of perfectly engineered pumps and motors and sells its products in numerous countries spread across 6 continents.

C . R . I . I S O N E A M O N G

the few pioneers in the world to produce 100% stainless steel submersible pumps. Having achieved a record production capacity of over 2 million pumps per annum, today C.R.I. is rubbing its shoulders with the best brands in the world, with advanced technology and safety standards as its hallmarks.

T H E I N F R A S T R U C T U R E

of C.R.I. is pretty comprehensive with state-of-the-art machineries and high potential in-house R&D recognised by the ministry of science and technology, Govt. of India - all within its own covered area of 300,000 square metres. The production environment is accredited with ISO 9001, ISO 14001 & OHSAS 18001 certifications and the products are CE, UR/UL, IEC, TSE & ISI certified. The R&D team always stays in tune with the changing scenario and seldom fails in coming up with outstanding solutions every time.

N E E D L E S S T O S A Y ,

behind this legendary growth lies the untiring, innovative, enthusiastic and dedicated team work. and, of course, a flawlessly maintained value system too. The name C.R.I. itself encapsulates the company's ethos: "Commitment, Reliability, Innovation".

C.R.I. MOTORS
Pumping trust. Worldwide.

Vision, Mission and Values

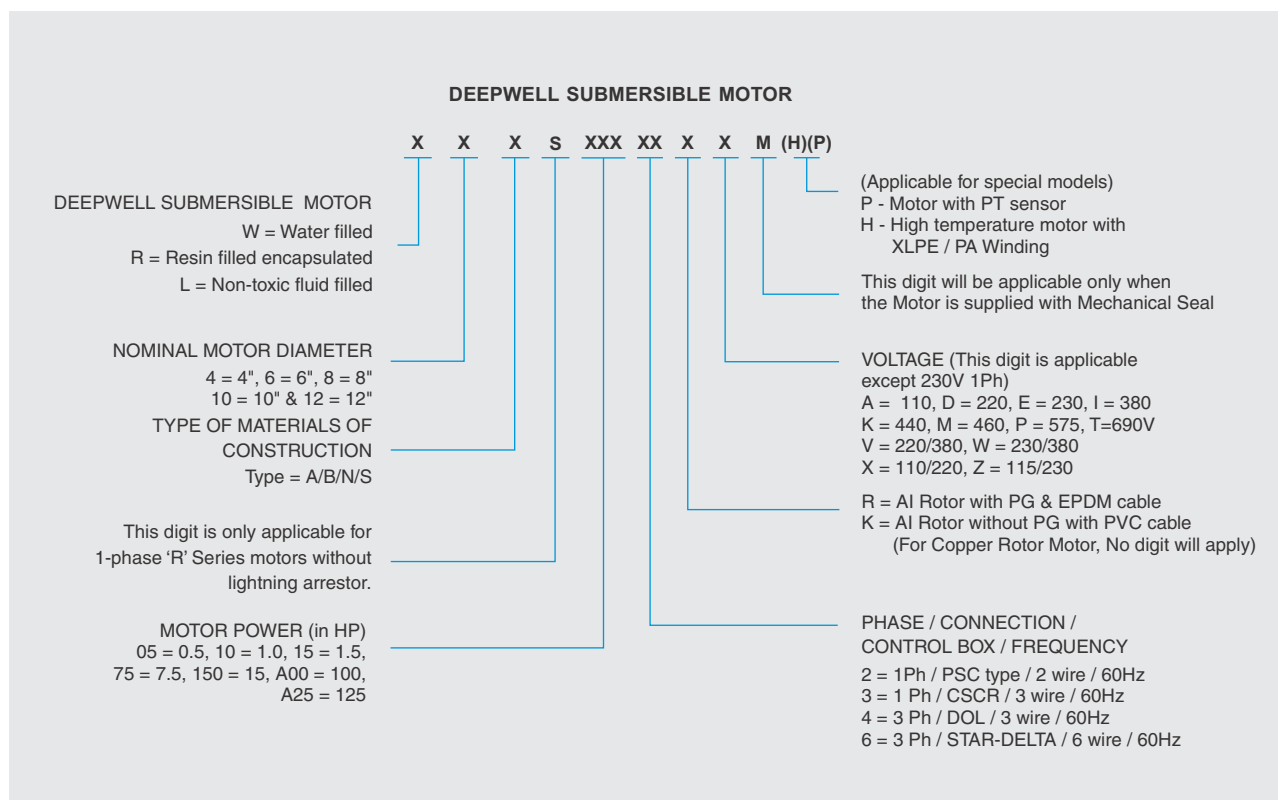

To be the industry leader providing best - in - class fluid management solutions to individual and institutional customers and societies in our chosen markets.

We will achieve this through our dedicated efforts to enhance the welfare of all our stakeholders and by living by our values of **commitment, reliability and innovation.**

OIL FILLED SUBMERSIBLE MOTORS

Nominal Diameter : **4"**

"L" Series

Deepstar

Description

These oil filled motors are one among the proven & successful products from the house of C.R.I. These motors are developed with due diligence complying with all safety standards and giving importance to the customers' need. All the components that are in contact with water are made of AISI 304 stainless steel and the motor is pre-filled with edible grade oil, which acts as coolant media as well as lubricant. The freezing point of the oil used is -10°C.

Ball bearings are used to withstand the high axial load and the lower ball bearings are of angular contact type.

High quality carbon/ceramic mechanical seal and oil seal made of Nitrile rubber are used to ensure better sealing system. Pressure equalizing rubber diaphragm is provided to balance the pressure and volume variations due to thermal expansion of the oil inside the motor. Motor sealing are made by means of 'O' rings. Shaft seals and sand guard prevents ingress of well water, sand and fiber particles into the motor. Care should be taken to ensure that the motor does not run when it is not submerged in the water. To prevent the motor from dry running, install water level monitor / dry run prevent. The motor needs a constant flow of water passed over it's body to keep it at correct operating temperature. Ideally the motors should be set just above the final yield point of bore well and when the level is not ascertained, fit a "flow inducer pipe" over the pumpset to ensure adequate cooling. It is mandatory to use C.R.I. Control boxes for all motors with adequate protection & control systems. Mounting dimensions of these motors are in accordance with NEMA standard.

Features

- High operating efficiency and lesser power consumption
- Extremely hardwearing ball & angular contact bearings
- Corrosive resistance stainless steel body
- Filled with non-toxic oil
- Can be easily dismantled and repaired

Applications

These prime mover submersible motors are suitable to couple with deepwell submersible pump ends used for

- Residential
- Industrial water supply
- Ponds
- Irrigation
- Sprinkler systems
- Mining
- Fountains
- Pressure boosting units
- CBM (coal bed methane)
- Gardens

OIL FILLED SUBMERSIBLE MOTORS

Nominal Diameter : **4"**

"L" Series

Deepstar

Specifications

Nominal Dia	4" (100mm)
Maximum Outer Diameter	3.74"
Power Range	0.5 HP to 3 HP - Single Phase
	0.5 HP to 10 HP - Three Phase
Speed	3450 rpm
Version	Single Phase - 110 V & 220 V, 60 Hz, A.C Supply
	Three Phase - 220 V, 380 V & 460 V, 60 Hz, A.C Supply
Class of Insulation	F
Degree of Protection	IP 68
Direction of Rotation	CCW - Single Phase
	Electrically Reversible - Three Phase
Type of Duty	S1 (Continuous)
Down Thrust Load	0.5 HP to 1 HP - 337 lbs
	1.5 HP to 4 HP - 562 lbs
	5 HP to 10 HP - 1011 lbs
Minimum Cooling Flow Along the Motor	0.5 ft/sec
Maximum Liquid Temperature	91.4°F
Maximum Immersion Depth	150 m
Starts per Hour	30 Times
Shaft Type	Splined as per NEMA Standard
Mounting Standard	NEMA Standard
Method of Starting	Single Phase - Permanent Split Capacitor (PSC)
	Three Phase - Direct On Line (DOL)
Cable Lead out	3 Wire Permanent Type TPE/EPDM Rubber Flat Cable

Type - A

Materials of Construction

Part Name	Type - A
Outer Shell	SS - 304
Motor Base	SS - 304
Shaft Extension	SS - 420
'O' Ring	High Nitrile Rubber
Mechanical Seal	Carbon / Ceramic
Diaphragm	High Nitrile Rubber
Cable	TPE / EPDM

RESIN FILLED ENCAPSULATED SUBMERSIBLE MOTORS

Nominal Diameter : **4" & 6"**

"R" Series

Description

These motors are hermetically sealed, encapsulated and water lubricated type with removable cable lead out. The stator windings are of enameled copper wire and the wound stator is mounted in a stainless steel shell and is completely protected by a stainless steel cylinder and stator room is pre-filled with resin. The resin filled in the space between the stator & the stainless steel cylinder dissipates heat quickly resulting in longer motor life. Except stator, other portions of the motor is pre-filled with deionised water containing propylene glycol (anti-freeze agent) which serves as coolant & lubricant for rotor, bushes and thrust bearing. Dynamically balanced rotors of these motors maintain uniform clearance thereby giving better efficiency and increase the life cycle of the water lubricated bush bearings. Specially designed high performance thrust bearings are used that can withstand high axial thrust loads and upthrust loads with minimum wear and tear.

The unique design of thrust bearings creates a wedge of water between the shoe and the disc and thereby providing better water lubrication and increases the life cycle of the thrust bearings. Pressure equalizing rubber diaphragm is provided to guard the pressure and volume variations due to thermal expansion of the water inside the motor. Motor sealing are made by means of 'O' rings. Shaft seals and sand guard prevents ingress of well water, sand and fiber particles into the motor. Care should be taken to ensure that the motor does not run when it is not submerged in the water. To prevent the motor dry running, install water level monitor / dry run preventor. The motor needs a constant flow of water past it's body to keep it at correct operating temperature. Ideally, the motor should be set just below the level at which water enters the bore well. When this level is not ascertained, fit a "flow inducer sleeve" over the pumpset to ensure adequate cooling. It is mandatory to install C.R.I. Control box for all single phase 3 wire motors. All 3 Ph motors require an adequate motor protection control panel. Mounting dimensions of motors are in accordance with NEMA standards.

Features

- Corrosive resistant stainless steel body.
- Specially designed thrust bearing to withstand high axial thrust loads.
- Low watt loss silicon steel laminations for better starting torque.
- Higher power factor resulting in lesser power consumption.
- Better heat dissipation for prolonged life cycle.
- All single phase two wire motors are supplied with in-built permanent split capacitor.
- Optional : All single phase models are also available with lightening arrester.

Applications

These prime mover submersible motors are suitable to couple with deepwell submersible pumps used for :

- Residential
- Irrigation
- Pressure boosting units
- Gardens
- Sprinkler System
- Industrial water supply
- Mining
- Oil & Gas
- De-watering

RESIN FILLED ENCAPSULATED SUBMERSIBLE MOTORS

Nominal Diameter : **6"**

"R" Series

Specifications

Nominal Dia	6" (150mm)
Maximum Outer Diameter	5.62"
Power Range	5 HP to 60 HP - Three Phase
Speed	3450 rpm
Version	Three Phase - 230 V, 380 V & 460 V, 60 Hz, A.C Supply
Class of Insulation	F
Degree of Protection	IP 68
Direction of Rotation	Electrically Reversible
Type of Duty	S1 (Continuous)
Down Thrust Load	5 HP to 30 HP - 3485 lbs
	40 HP to 60 HP - 6182 lbs
Minimum Cooling Flow Along the Motor	0.52 ft/sec
Maximum Liquid Temperature	5 HP to 40 HP - 86°F, 50 HP & 60 HP - 122°F
Starts per Hour	20 Times
Shaft Type	Splined as per NEMA Standard
Mounting Standard	NEMA Standard
Method of Starting	Three Phase - Direct On Line (DOL)
	Three Phase - Star Delta (SD)
Cable Lead out	3 Wire Removable Type TPE Flat Cable

Materials of Construction

Part Name	Type - A
Housings Shell	SS - 304
Stator Shell	SS - 304
Thrust Pad	Carbon Graphite
Thrust Bearing	SS - 420
'O' Ring	Nitrile Rubber (NBR)
Diaphragm	Nitrile Rubber (NBR)
Motor Base	SS - 304
Cable	TPE

WATER FILLED REWINDABLE SUBMERSIBLE MOTORS

Nominal Diameter : **4", 6", 8", 10" & 12"**

"W" Series

Wellrounder

Description

These motors are eco-friendly, wet type, water filled and rewindable. The stator windings are of water proof synthetic film insulated copper winding wires. It features water lubricated thrust and journal bearings. Motor is pre-filled with clear, cold, pure, fresh, filtered propylene glycon (anti-freez agent) mixed water. Before commissioning, ensure the pre-filled level of water inside the motor. If any loss of volume is noticed, refill with clear, cold, pure, fresh, filtered water, through water filling plugs / valves provided in the upper housing. Where the use of anti-freeze agent mixed water is not be allowed for special applications, these motors can also be filled with clear, cold, pure, fresh, filtered water and operated. Dynamically balanced rotors maintains uniform clearance thereby giving better efficiency and increase the life cycle of the water lubricated bush bearings. Specially designed high performance thrust bearings are used to withstand high axial thrust loads and up thrust loads with minimum wear and tear.

The unique design of thrust bearings create a wedge of water between the shoe and the disc, and thereby providing better water lubrication and increases the life cycle of the thrust bearings. Pressure equalizing rubber diaphragm is provided to balance the pressure and volume variations of the water inside the motor. Motor sealing are made by means of 'O' rings. Shaft seals and sand guard prevents ingress of well water, sand and fiber particles into the motor. Care should betaken to ensure that the motor does not run when it is not submerged in the water, To prevent the motor from dry running, install water level monitor/dry run preventor. The motor needs a constant flow of water passed over it's body to keep it at correct operating temperature. Ideally the motors should be set just above the final yield point of bore well and when the level is not ascertained, fit a "flow inducer pipe" over the pumpset to ensure adequate cooling. It is mandatory to use C.R.I. Control boxes for all motors with adequate protection & control systems. Mounting dimensions of these motors are in accordance with NEMA standard.

Features

- Water cooled Re-windable motor
- Can be easily dismantled and repaired
- High operating efficiency
- Extremely hardwearing and water lubricated bearings
- Specially designed thrust bearing to withstand high axial loads.
- AISI 630 (17.4 PH) motor shaft extension for longer life.

Applications

These prime mover submersible motors are suitable to couple with deepwell submersible pumps used for

WATER FILLED REWINDABLE SUBMERSIBLE MOTORS

Nominal Diameter : **4"**

"W" Series

Wellrounder

Specifications

Nominal Dia	4" (100mm)
Maximum Outer Diameter	3.81"
Power Range	0.5 HP to 10 HP - Three Phase
Speed	3450 rpm
Version	Three Phase - 220 V, 380 V & 460 V, 60 Hz, A.C Supply
Class of Insulation	Y
Degree of Protection	IP 58
Direction of Rotation	Electrically Reversible
Type of Duty	S1 (Continuous)
Down Thrust Load	0.5 HP to 2 HP - 800 lbs
	3 HP to 10 HP - 1500 lbs
Minimum Cooling Flow Along the Motor	0.25 ft/sec
Maximum Liquid Temperature	91.4°F
Starts per Hour	20 Times
Shaft Type	Splined as per NEMA Standard
Mounting Standard	NEMA Standard
Method of Starting	Three Phase - Direct On Line (DOL)
Cable Lead out	Permanently Connected and Sealed 3/4 Core TPE/EPDM Rubber Flat Cable

Type - A/N

Materials of Construction

Part Name	Type - A	Type - N
Shaft Seal	Nitrile Rubber (NBR)	Nitrile Rubber (NBR)
Housing Shell	SS - 304	SS - 316
Stator Shell	SS - 304 / 441	SS - 316
Thrust Pad	Carbon Graphite	Carbon Graphite
Thrust Bearing	SS - 420	SS - 420
Diaphragm	High Nitrile Rubber	High Nitrile Rubber
Motor Base	SS - 304	SS - 316
Bush	Carbon	Carbon

220, 380 & 460V, THREE PHASE

Specifications

Nominal Dia	6" (150mm)
Maximum Outer Diameter	5.62"
Power Range	5 HP to 60 HP - Three Phase
Speed	3450 rpm
Version	Three Phase - 220 V, 380 V & 460 V, 60 Hz, A.C Supply
Class of Insulation	Y
Degree of Protection	IP 58 / IP 68
Direction of Rotation	CCW - Single Phase
	Electrically Reversible - Three Phase
Type of Duty	S1 (Continuous)
Down Thrust Load	5 HP to 30 HP - 3500 lbs
	35 HP to 60 HP - 6000 lbs
Minimum Cooling Flow Along the Motor	0.5 ft/sec
Maximum Liquid Temperature	91.4°F
Starts per Hour	20 Times
Shaft Type	Splined as per NEMA Standard
Mounting Standard	NEMA Standard
Method of Starting	Three Phase - 5 HP to 60 HP - Direct On Line (DOL)
	Three Phase - 7.5 HP to 60 HP - Star Delta (SD)
Cable Lead out	Permanently Connected and Sealed 3/4 Core PVC / Rubber Insulated Flat Cable
Thermal Protection	High Temperature Motors for 158°F / 194°F can be supplied with PT Sensor and XLPE / PA Winding

* On request motors 440 & 690V can be supplied.

The above mentioned electrical data are applicable for Star-Delta motors also

Note: Star-Delta motors are available from 7.5 H.P. onwards.

In view of continuous developments, the information / descriptions / specifications / illustrations are subject to change without notice.

WATER FILLED REWINDABLE SUBMERSIBLE MOTORS

Nominal Diameter : **8"**

"W" Series

Wellrounder

Specifications

Nominal Dia	8" (200mm)
Maximum Outer Diameter	7.71"
Power Range	50 HP to 125 HP - Three Phase
Speed	3450 rpm
Version	Three Phase - 380 V & 460 V, 60 Hz, A.C Supply
Class of Insulation	Y
Degree of Protection	IP 58 / IP 68
Direction of Rotation	Electrically Reversible - Three Phase
Type of Duty	S1 (Continuous)
Down Thrust Load	50 HP to 60 HP - 10000 lbs
	75 HP to 125 HP - 12500 lbs
Minimum Cooling Flow Along the Motor	0.5 ft/sec
Maximum Liquid Temperature	91.4°F
Starts per Hour	10 Times
Shaft Type	Splined as per NEMA Standard
Mounting Standard	NEMA Standard
Method of Starting	Three Phase - 50 HP to 125 HP - Direct On Line (DOL)
	Three Phase - 50 HP to 125 HP - Star Delta (SD)
Cable Lead out	Permanently Connected and Sealed 3/4 Core PVC / Rubber Insulated Flat Cable
Thermal Protection	High Temperature Motors for 158°F / 194°F can be supplied with PT Sensor and XLPE / PA Winding

* On request motors 440V & 690V can be supplied.

Materials of Construction

Part Name	Type - B	Type - S
Shaft Seal Housing	Cast Iron	SS - 304 Casted

TEMPERATURE

To Convert From	To	Use Formula
Celsius, tC	Kelvin, tK	tK = tC + 273.15
Fahrenheit, tF	Kelvin, tK	tK = (tF + 459.67) / 1.8
Celsius, tC	Fahrenheit, tF	tF = 1.8 tC + 32
Fahrenheit, tF	Celsius, tC	tC = (tF - 32) / 1.8
Kelvin, tK	Celsius, tC	tC = tK - 273.15
Kelvin, tK	Fahrenheit, tF	tF = 1.8 tK - 459.67

W I N N I N G W A Y S

When you have a good thing going it is quite in the fitting of things that recognitions come our way. Several prestigious awards, which decorate our shelf, say it all. These rewards not only acknowledge our position as a leader in the water pump industry but also serve as reminders about what the customer expects from a winner. And we, as ever, have our ears perfectly tuned to customer expectations.
